Building Management System

Building Management System

- 600 Physical Data Points
- 100 Integration Data Points
- Cooling Center Tower - management and monitoring of two chillers and five circulating pumps.
- Heating Center - control and monitoring of two circulating pumps.
- Air Handling Units – management and monitoring of seven AHUS.
- Air heating units-management of ten air heating units.
- Monitoring of sensors in production rooms.
- Calibration of 23 sensors.
- Validation of 600 Physical Data Points
- Generate daily and monthly reports

Project details

Duration

2022

Scope of activities

- Delivery and installation of:
 - Field equipment
 - DDC controllers and modules
 - BMS operator station
 - Variable speed drivers
- Start up and setup, user training and documentation
